TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL, PHP, HTML5, SCSS/CSS3, C

Backend: Spring Boot (Java 21), REST APIs, Laravel, Node.js

Frontend: Angular (8-12+), React, Bootstrap, Tailwind CSS

Databases: PostgreSQL, MySQL

Cloud & DevOps: Google Cloud Platform, Cloudflare R2, Jenkins, CI/CD, Docker

Practices & Tools: Agile/Scrum, Unit Testing, Accessibility (WCAG), Git, GitLab, Bitbucket, JIRA

PROFESSIONAL EXPERIENCE

Fullstack Developer, Natixis – Porto, Portugal

July 2024 – Present

- Developed and maintained banking payment systems for card transaction processing, building a Card API that handles more than 2.4 million calls per day in production
- Built and integrated secure REST APIs for card payment and transaction workflows using Spring Boot and Angular, processing sensitive financial and cardholder data under banking compliance standards
- Led Angular version migrations across the payments platform and established unit testing and CI/CD pipelines with Jenkins and Bitbucket, reducing regression defects on financial-grade releases

Technologies: Spring Boot, Java, Angular 9+, TypeScript, REST APIs, Jenkins, Bitbucket, HTML5, SCSS

Front End Engineer II, Symplicity Corporation – Remote

July 2022 – July 2024

- Built Advocate, a university student case management and advocacy platform, from initial architecture through production launch, adopted by multiple U.S. university clients
- Developed accessible UI components meeting WCAG standards across several higher-education products, ensuring equitable access to case management tools for students with disabilities

Technologies: Angular 12+, TypeScript, SCSS, HTML5, GitLab

Front End Engineer, IngressoLive – Brazil (Remote)

Oct 2021 – July 2022

- Developed e-commerce ticketing platforms using Laravel and Angular 8, implementing secure checkout flows and site architecture for digital ticket sales
- Defined coding requirements including e-commerce capability and security controls, and monitored plugin functionality for continuous improvement

Technologies: Laravel, Angular 8, PHP, JavaScript

Fullstack Web Developer, Easyjur – Brazil (Remote)

Mar 2021 – Oct 2021

- Contributed to legaltech web applications using PHP, AJAX, and MySQL on Google Cloud Platform within an agile engineering team, supporting continuous product improvement

Technologies: PHP, AJAX, MySQL, Google Cloud Platform

PROJECTS

ImoDesk – PropTech CRM SaaS

2025 – Present

- Architecting a multi-tenant CRM for independent real estate agents in Portugal as solo founder, using Angular, Spring Boot (Java 21), and PostgreSQL, with JWT authentication, Stripe billing, and Cloudflare R2 storage

Technologies: Angular, Spring Boot, Java 21, PostgreSQL, Flyway, MapStruct, Stripe, Cloudflare R2

EDUCATION

Bachelor's Degree, Information Technology, Higher Institute of Technological Studies of Sousse

2021

Certifications: EF SET English Certificate, C1 Advanced | AIESEC Global Talent Partner

Languages: English (Professional), French (Professional), Portuguese (Professional), Arabic (Native)
